## EDUCATION

---

**SRM University AP** | *Bachelor of Technology*

*Andhra Pradesh, India* | **10/2022-Present**

- Cumulative **GPA**: 6.98/10

**Arniko College** | *Intermediate(+2)*

*Birgunj, Nepal* | **06/2019-07/2021**

- Cumulative **GPA**: 8.3/10

## SKILLS

---

- **Language**: C/C++, Python, HTML/CSS, JavaScript.
- **College Coursework**: OOPs, Data Structures and Algorithm
- **OS**: macOS, Windows
- **Version Control**: Git & GitHub

## PROJECTS

---

### Spotify Clone

- Build a spotify clone app using HTML, CSS and JavaScript.
- Designed and implemented the user interface (UI) for a seamless and intuitive user experience.
- Controls for play, pause, skip, volume adjustment, and repeat/shuffle options.
- Utilization of databases or local storage for securely storing user information, playlists, and preferences.

### Credit Card Validator

- Implemented a C++ program to developed a robust CreditCard class with encapsulated data members and member functions, showcasing proficiency in OOP principles.
- Implemented comprehensive validation checks in the isValid() function to ensure the integrity of credit card data.
- Successfully implemented the Luhn algorithm (passesLuhnAlgorithm()) to validate credit card numbers, demonstrating strong algorithmic skills.

## CERTIFICATIONS

---

### The Joy Of Computing Using Python by NPTEL

- *variable, expression, loop, conditionals, list, tuples, recursion, sentiment analysis, image processing*

### GitHub Essential Training by Aaron Stewart

- *git push, git pull, git fetch, git merge, git clone, git add, git commit, git checkout, git remove*
